Professional Summary

Full Stack Software Engineer with **1.5+ years of experience** building scalable web applications and backend systems. Recently completed a **Software Application Developer Apprenticeship at Google**, delivering AI-powered search features to millions of monthly users — achieving **40% improvement in AI answer accuracy, 80% expansion in data coverage, and a 50% increase in tool selection rate**. Demonstrated experience in managing the end-to-end product lifecycle, bridging complex backend data with functional frontend interfaces. Driven by a deep understanding of the **Software Development Lifecycle (SDLC)**, with a focus on performance, scalability, and **user-centric engineering**.

Technical Skills

Programming Languages: Java, C++, HTML5, CSS3, JavaScript (Vanilla JS), TypeScript
Frameworks and Libraries: React.js, Node.js, Express.js, Angular, Bootstrap, Spring Boot, Tailwind CSS
Databases: MySQL, PostgreSQL, MongoDB, GraphQL
DevOps and Tools: Git, GitHub, Postman, Swagger, Docker, Linux, Vercel, Eclipse, Visual Studio Code
CS Fundamentals: Data Structures and Algorithms, Object-Oriented Programming (OOP), DBMS, System Design

Experience

Google

April 2025 – March 2026

Software Application Developer Apprentice

Bengaluru, Karnataka

- Developed a multi-tier sourcing system for Google Search, prioritizing first-party structured knowledge sources over third-party APIs, improving data reliability for 500M+ monthly queries.
- Designed and shipped a scalable Query Result Service (QRS) data provider framework, serving 100+ structured data points for traditional and EV two-wheeler specifications to AI-driven search tools (AIM).
- Built a textualization service enabling AI answers to cite structured knowledge sources, boosting answer accuracy by 40% and meeting enterprise-grade auditability and compliance requirements.
- Applied Prompt Engineering to generate diverse query sets for intent-matching evaluation, driving a 50% increase in tool selection rate for the Motorcycle feature; increased unit test coverage by 80% across data access and query processing.
- Delivered frontend UI components for the PriceBreakDown feature with INR currency localization, achieving a 5% uplift in user engagement through cross-functional collaboration with UX and QA.

LTI Mindtree

December 2024 – March 2025

Software Engineer

Bhubaneswar, Odisha

- Led a 5-engineer team delivering a full-stack Pet Care platform in a 10-day Agile sprint; owned HLD, LLD, and data structure decisions across a normalized 8+ entity relational schema, managing SDLC from requirements to deployment.
- Engineered secure REST APIs using Spring Boot and Spring Security (RBAC + JWT) for 3+ user roles and built a Hibernate ORM/JPA persistence layer with optimized mappings and documented 30+ endpoints using Swagger.
- Managed Maven builds and Git version control across 50+ commits, led code reviews, and drove weekly client syncs — enforcing coding standards and ensuring consistent, conflict-free release cycles.

Oasis Infobyte

August 2023 – September 2023

Frontend Developer Intern

Hyderabad, Telangana

- Created 3+ frontend applications following MVC architecture using HTML5, CSS3, and Vanilla JavaScript, applying modular design patterns, DOM manipulation, and event-driven programming for scalable, maintainable UI components.
- Conducted cross-browser and responsive UI testing across 4 major browsers and multiple device sizes using DevTools and debugging workflows; resolved layout and CSS issues for consistent UX.

Projects

VedaMate – AI-Powered Learning Platform | [CERTIFICATE](#)

November 2025

- Architected a RAG-based learning platform using FastAPI, LangGraph, LLMs, and vector embeddings for 200+ page textbooks, delivering syllabus-aligned responses, reducing hallucinations, and improving answer relevance by 50%.
- Implemented retrieval pipelines generating 10–20 topic modules per textbook with isolated vector stores; automated quiz generation producing 8–15 context-aware questions with AI hints and explanations.

Education

Gokaraju Rangaraju Institute Of Engineering and Technology

September 2020 – August 2024

Bachelor of Technology in Electronics and Communication Engineering

Hyderabad, Telangana
